Professional Summary

IT graduate (Bachelor of Information Technology, Deakin University, Oct 2026) seeking a graduate or IT Support (Level 1) role. Brings 12 months of part-time first-line support experience resolving Windows, Outlook, login, printer and Wi-Fi issues, plus hands-on AWS, Docker and Kubernetes skills from building and load-testing a cloud IoT system. Calm under pressure after two and a half years in high-volume customer service. Available immediately and open to relocating anywhere in Australia.

Key Skills

- **IT Support:** Windows, Microsoft Outlook, login and account issues, printer and Wi-Fi troubleshooting, logging and escalating requests, customer service
- **Cloud & DevOps:** AWS (EC2, Lambda, SQS, IoT Core, IAM, CloudWatch), Docker, Kubernetes, Google Cloud
- **Programming:** Python, JavaScript, Node.js, C#, SQL, HTML/CSS, REST APIs, MongoDB
- **Tools:** Git, GitHub, Postman, Qualtrics, Figma, documentation

Relevant Experience

Research Assistant (Casual), previously IT Placement Intern | Deakin University, Melbourne — Jun 2026 – Oct 2026

- Started with a 160-hour industry placement on the Rainbow Mission UX research project, then continued as a paid casual Research Assistant
- Ran usability tests and Qualtrics surveys with participants, collected data and analysed feedback to recommend improvements

IT Intern (Part-time) | Promatics Technologies, Delhi, India — Feb 2023 – Jan 2024

- Provided first-line IT support to staff by email, chat and in person
- Resolved Windows, Outlook, login, printer and Wi-Fi issues, logging each request and escalating complex problems to senior colleagues
- Supported maintenance of company websites using HTML and Python

Key Projects

Smart Climate Management System (IoT) | Deakin University — View code

Node.js, MQTT, AWS IoT Core, SQS, Lambda, CloudWatch, MongoDB Atlas, Node-RED

- Built an event-driven pipeline (MQTT → AWS IoT Core → SQS → Lambda → MongoDB Atlas) with a live Node-RED dashboard
- Load-tested to 1,000 sensors, found a database bottleneck and added SQS buffering: 9,007 messages, zero loss
- Debugged an AWS IoT authorisation failure with CloudWatch and secured devices with X.509 certificates and TLS

SplashKit Open-Source Contributions | Thoth Tech Capstone, Deakin University — View pull requests

C++, C#, Python, Git, GitHub

- Contributed 50+ usage examples in C++, C# and Python through GitHub pull requests, and reviewed peers' code
- Fixed a documentation routing issue, restoring two previously undiscoverable guide pages

Cloud Deployment | Deakin University

AWS EC2, Docker, Kubernetes, Google Cloud, Express

- Deployed web apps on AWS EC2 with load balancing and auto-scaling, and containerised a Node.js app with Docker
- Deployed workloads to Kubernetes on Google Cloud and secured an Express app with HTTPS and Helmet headers

Additional Experience

Crew Member | McDonald's, Kew, VIC Apr 2024 – Oct 2026

- Delivered fast, friendly service and resolved customer issues calmly in a high-volume environment
- Worked as part of a team to meet speed, quality and safety standards while studying full time
